

**ALL PRE-PAINTED STEEL IS NOT CREATED EQUAL**

## KIWICOLOUR® – A BRAND YOU CAN TRUST

Through the development of the KiwiColour® brand, Kiwi Steel has become not only a steel supplier but a resource for architects, builders, developers, installers, and home owners to achieve their creative vision. Strong collaborative partnerships with industry leaders has enabled Kiwi Steel to develop innovative ideas in coating technology to competitively supply high quality product to transform the landscape of the New Zealand building industry.

With this success it has become increasingly important for Kiwi Steel to protect and maintain the high standards set by the KiwiColour® brand. It has been noted that there is other imported pre-painted steel available in the market that doesn't meet the same stringent testing and quality control requirements that KiwiColour® has been subjected to. KiwiColour® products have been tested by an independent laboratory against the corrosion resistance performance requirements of AS/NZS 2728:2013, with results showing that the product surpasses criteria in regard to salt spray performance, humidity resistance, coating thickness, gloss, and cross hatch adhesion for Product Type 4. All KiwiColour® paint systems have also been verified as lead free through independent SGS testing.

KiwiColour® utilises custom paint formulas and a superior aluminium-zinc coating of 200gm/m<sup>2</sup>, an increase on the standard 150gm/m<sup>2</sup> coating that is typically offered in the market. The pre-painted baked on finish and aluminium-zinc alloy is coated on a steel base metal of 0.4mm or 0.55mm thickness, meeting the performance and 15 year durability requirements of NZBC B2.3(c) for roofing and cladding when manufactured, installed, and maintained according to Kiwi Steel's recommendations. There is a full range of colours and patterned finishes available so there will be an option for every environment, application, and aesthetic requirement.

Please note KiwiColour® is currently the only recognized brand of imported pre-painted steel that has been developed specifically for the New Zealand environment that is also backed with full local product warranty. There are numerous importers supplying untested product to the market without proper product warranty so please specify 'KiwiColour®' when enquiring to ensure you receive the genuine KiwiColour® product that you can have confidence in.

**Unlock the power of colour. KiwiColour®, the future of pre-painted steel.**
