

# DOUBLE-ENDED STUD BOLTS FOR BIN STIFFENERS

## WHAT IT DOES

The Sukup Double-Ended Stud Bolt is for use on laminated bin sheets and solves the potential problem of water weeping behind the stiffeners and into the bin causing spoiled grain. The patent pending design features a rubber-backed steel washer in the middle of the bolt that is set between the stiffener and sidewall sheets. This provides a tight seal directly to the outer sidewall sheet behind the stiffener, eliminating water infiltration between the sheets and into the grain.
